JOB OPPORTUNITY

Telecom Standards Patent Engineer

Our team is growing, and we are looking for a Patent Engineer who will work closely with the technical experts to provide support to the licensing and business development teams.

Key responsibilities:

- Patent portfolios analysis / due diligence especially in the context of standardized technologies for mobile communications such as 3GPP standards (4G, 5G), IEEE 802.11.
- Drafting or assessments of "Evidence of use" (claim chart).
- Investigation on technology adoption and potential patent infringement.
- Patent/technology landscape searches on patent databases.
- Assistance in patent licensing and litigation matters, patent acquisitions.
- Development of conformance/infringement tests.

Required Skills:

- A master's degree in Electrical Engineering, Telecommunications or Computer Science.
- Fluency in English.
- Ability to organize and prioritize the workload to meet deadlines and daily requirements.
- Aptitude to work effectively both independently and with others in a cooperative manner to accomplish the assigned tasks and participate in team efforts.
- A plus is the knowledge of the telecommunications technologies especially related to 3GPP (4G, 5G) and IEEE 802.11 radio interface protocols

Desired Skills:

- Doctoral work on the above-mentioned technologies and communication standards.
- Basic knowledge of the patent system.
