Both the payment and the self-declaration must take place before the deadlines illustrated in art. 3.

Should the self-declaration be found to be false or incorrect, the registration for the test, or the test itself, will be cancelled.

1. Applicants who have taken/will take more than one test for admission to various Bachelor's degree programmes offered by Politecnico and are admitted to the Architecture programme must reserve their student place or enrol before the deadlines (art. 14) - in order to avoid losing their place.     - b. pay 16.00 Euro for the virtual revenue stamp required for the withdrawal form (this amount must be paid from their personal page of the Teaching Portal).
    - c. enrol in the new Bachelor's degree programme only after receiving the withdrawal confirmation (an e-mail confirming their withdrawal will be sent to their Polito mailbox). To enrol in the new programme, students must log in to their personal page of the Teaching Portal and then log in to the Apply@polito platform using the student number they received when they enrolled in the first programme.
  - enrol in the new programme and – during the enrolment process - declare on the Apply@polito platform that they also want to enrol in another Politecnico programme for which they have taken the admission test.

For both options, the procedure must be completed before the enrolment deadline following the instructions that will be provided in the "Enrolment regulations – A.Y. 2023/24" referred to in art. 14, par. 6.
2. Applicants who have taken the TIL-A test and are awaiting the results of the admission tests to other universities must enrol at Politecnico before the deadlines in order to avoid losing their place. ## ANNEX C

### HOW TO TAKE THE ONLINE TIL TEST (ONLINE ADMISSION TEST)

A.Y. 2023/2024

Applicants must take the admission test using a special browser that locks down all computer functions other than the test. Tests are also proctored by audio and video recording through the PC webcam and microphone. Moreover, applicants must connect to a Virtual Classroom from their smartphone or tablet. The Virtual Classrooms allow test supervisors to monitor applicants during the test.

Here follow the details and technical requirements to take the online test.

#### Technical requirements

Applicants need to have the technical equipment described below and they must check their equipment at home a few days before the test. The details of the system checks are listed below and will be made available on the Apply@polito platform - TIL section.

#### Technical equipment:

1. **a desktop or laptop computer** (hereinafter referred to as the “*device to take the TIL test*”) with Windows 10 or higher or Mac operating system, plugged to the electrical power supply and connected to the Internet, **with a video camera and a microphone**. On this device applicants must install Google Chrome and another software called “Lockdown Browser”. The instructions for the installation of the Lockdown Browser will be provided on the Apply@polito platform (applicant personal page). This PC will be used for:
  - taking the test;
  - proctoring the test;
2. **a stable data network** to connect to the Internet from the device to take the TIL test
3. **a smartphone or tablet** (hereinafter referred to as the “*proctoring device*”), plugged to the electrical power supply and connected to the Internet, **with a video camera**. The proctoring device will be used by the Test Supervisors for the identification of applicants and as a further proctoring tool.
4. **a stable data network** to connect to the Internet from the proctoring device (possibly different from the data network used for the device to take the TIL test).

Applicants must take the test in a quiet private place with enough light (hereinafter referred to as the “room”). They need to set up a table for the device to take the TIL test (referred to as the “workstation”) making sure that the light source is not directly behind it.

**No one can enter the room during the test**, except for assistants for students with disabilities or with specific learning disorders who have submitted a specific request for assistance.

The workstation must be clear of all objects. On the workstation, applicants are allowed to keep only their identification document, some blank sheets of paper and a pen or a pencil. Applicants must prepare all materials in advance, as they will not be allowed to leave the workstation after the beginning of the test.

### What to do a few days before the test

A few days before the test, and in any case before the day preceding the test, applicants **must:**

1. install Google Chrome and the *LockDown Browser* software on their device to take the TIL test. The instructions and link will be made available on the applicants' personal page of the Apply@PoliTo platform. Important: applicants must install the LockDown Browser using the installation file available at the link that they can find on their personal page. Other software versions must be uninstalled as they are incompatible.
2. take the practice test at least one time before the test. The practice test is available on the applicants' personal page of the Apply@PoliTo platform – TIL section. This allows to check if the LockDown Browser has been installed correctly and helps to get familiar with it.

Applicants are required to take the practice test in order to troubleshoot possible technical problems that might impair the result of the admission test.

### What to do right before the test

On the day of the test, applicants must organise the room where they will take the test as explained in the previous section (*Technical Requirements*). Internet connection on **both devices must be always active** during the test (please note that there will be an estimated data traffic of 500 MB for each device).

In the event if an Internet outage for a period of time that does not allow to properly monitor the applicant, the test will be considered invalid. This decision will be taken by the Central Committee and it is unquestionable. For more information read the next paragraphs (*Procedures in the event of persistent Internet connection problems* and *Procedures in the event of disconnection from the Virtual Classroom*).

Please note that the Virtual Classroom will audio and video record applicants webcam while they take the test through their PC. The recordings can be used by the Committee to check the integrity of the test.

Applicants must make sure they have an identification document, some blank sheets of paper and pens or pencils on their workstation.

### What to do during the test

At the beginning of the test applicants must:

1. Log in to their personal page of the Apply@polito platform **from both devices** using **Google Chrome**.
2. Log in to the "test start page" with the **proctoring device** and from this page log in to the Virtual Classroom called **Proctoring Room**. Logging in to the Virtual Classroom on the Apply@polito platform is equivalent to signing one's attendance to the test and proves that the applicant has taken the test.
3. **Wait to receive instructions from the test supervisor.**
4. When the test supervisor calls the roll to identify the applicants, each student must:

- a. Use the proctoring device to show his/her identification document, face, room and workstation. The applicant must also show his/her paper sheets to prove that they are blank;
  - b. Place the proctoring device behind his/her shoulders, in a slightly lateral position, so that the video camera catches the image of the applicant and of the workstation.
5. After the identification phase, start the test when the test supervisor gives the authorization to do so.
6. **Using the device to take the TIL test**, log in to the personal page of the Apply@polito platform and click the button "Click here to start the test".
7. Start the Lockdown Browser when requested and wait for the automatic display of a window with the **TIL Virtual Classroom**. The webcams and microphones on both devices must be kept switched on at all times during the test.

### Conduct rules during the test

During the test, applicants must behave properly as normally required during examinations. To make sure that the test is valid, applicants must strictly abide by the following conduct rules:

1. For the entire duration of the test:
  - a. do not disconnect from the Virtual Classrooms and keep the webcam and microphone of the both devices always on. Do not use these devices for any other purpose;
  - b. do not allow other people to enter the room where the test is taking place;
  - c. be absolutely silent during the test in order to avoid disturbing other applicants in the same Virtual Classroom (unless the applicant needs to talk to the test supervisor);
  - d. use only blank sheets of paper and a pen (if necessary);
  - e. show the workstation and identification document again if required by the test supervisor.
2. In the event of technical problems during the test or other issues, immediately report the problem to the Test Supervisor raising your hand or calling him/her.

Applicants are **not allowed to use headphones, earphones, calculators, notes or other teaching material** during the test, without prejudice to the provisions for students with disabilities or specific learning disorders.

The test supervisors will monitor the applicants during the test to make sure they are complying with the conduct rules. If an applicant violates the conduct rules, the test supervisors will immediately inform the Central Committee that will decide on the immediate invalidation of the test.

### How the test works

The test is divided into sections, as explained in the Call for applications and on the [website](#) of the University. Each section must be completed in a given pre-set time. The sections must be completed following the same order shown on the applicant personal page of the

Apply@PoliTo platform. Applicants are not allowed to move to the next section until the previous section time expires.

The test automatically finishes when the overall time expires.

### **Test scores**

Applicants will see their test score on their personal page of the Apply@PoliTo platform at the end of the test.

In the event of suspect inappropriate behaviour of an applicant, at the end of the test the Central Committee will examine the video and audio recordings of the Virtual Classroom.

The Central Committee has three working days from the test date to examine the recordings and verify if there has been a violation of the conduct rules. In such case, the test will be invalidated and the applicant will be informed by e-mail.

### **Procedures in the event of persistent Internet connection problems**

In the event of an Internet outage (on both devices) lasting for a period of time that does not allow to monitor the integrity of the test, the test will be considered invalid. This decision is taken by the Central Committee and is unquestionable.

If an applicant has persistent Internet problems, the Central Committee may decide to reschedule the test at the end of the same day during a dedicated time slot. In this case, the applicant will not have to pay the TIL registration fee again. If an applicant needs to retake the test, he/she will be immediately informed.

If an applicant cannot access the test due to technical problems verified by the University or due to issues that do not depend on the applicant and on his/her correct use of the compulsory devices, the Central Committee may reschedule the test at the end of the same day during a dedicated time slot. In this case, the applicant will not have to pay the registration fee again. If an applicant needs to retake the test, he/she will be immediately informed.

### **Procedures in the event of disconnection from the Virtual Classroom**

If the applicant's second device is disconnected from the Virtual Classroom for a period of time that does not allow to monitor the applicant during a specific section of the test, the applicant and the Test Supervisor will receive a message on their screens.

The Test Supervisor will disable the test but the applicant will be able to complete the ongoing section. In order to move to the next section, the applicant must join the Virtual Classroom again.

In the event of disconnections depending on poor network quality that cannot be solved quickly enough to complete the test within the pre-set time, the test will be rescheduled at the end of the same day during a dedicated time slot. In this case, the applicant will have to take the whole test again (no matter if the disconnection happened during a specific test section).

In the event of technical problems caused by Politecnico during a specific test section, the applicant will have to retake that specific section only (his/her results in the other sections will remain valid) at the end of the same day during a dedicated time slot.

di Torino**
