

## Consiglio del Collegio di Ingegneria Chimica e dei Materiali

### MSc in Materials Engineering for Industry 4.0

To register for their graduation exam, students must access their student web page and complete the registration process by the deadline specified by the Student Secretariat, typically occurring 15-20 days before the graduation date.

For the preparation of the thesis and summary, candidates must adhere to the templates uploaded on the Notice Board on the MSc Materials Engineering for Industry 4.0 web page. It is essential for candidates to ensure the high quality of images and tables (for readability) and to be meticulous in their bibliographic citations. Avoid citing sources lacking scientific credibility.

**Within 7 days before the thesis defence, candidates must upload a PDF file of their thesis along with a 2-page summary through their student web page.** The date for the defence and proclamation is determined by the University calendar and is publicly announced on the general Notice Board. The sequence of thesis presentations in each session is planned by the Academic Advisor for the MSc programme or the Chairman of the “Collegio”. Candidates are required to adhere to the schedule provided in the convocation on the day of the defence.

MSc graduates are exempt from any other obligations.
