The value of collaboration

Bringing research and innovation closer together to generate new ideas and solutions for society and global development

For Companies
- Achieve and develop new knowledge and technologies
- Become more competitive
- Introduce innovation
- Open up to multidisciplinarity
- Become part of an ecosystem of excellence
- Benefit from tax credit

For Politecnico
- Identify real use cases of research application
- Give value to research results and create impact on society and economy
- Create opportunities for Ph.Ds and researchers
- Improve international reputation through scientific publications
Become part of an established NETWORK of local and international companies

By Partnership agreements we enhance strategic combined activities of long term duration, between partners and Politecnico, through research, innovation and technology transfer function.
Our services for companies

01. RESEARCH & DEVELOPMENT
Politecnico adopts a multidisciplinary and shared approach in order to support companies overcoming the challenges of innovation according to the most suitable methods: research projects, consultancy, tests or Ph.Ds.

02. PEOPLE: SKILLS AND TRAINING
Through the Master School, the Ph.D unit and the Career Center, Politecnico provides effective opportunities to attract the best talents, to train and integrate them into the corporate word. Moreover, for those who already work in companies, there are tailor-made courses for upskilling and reskilling, through Master’s programmes, training and industrial Ph.Ds.

03. BUSINESS AND OPEN INNOVATION
Linking research to innovation and reducing the time frame that takes an idea to become a mature technology: to do that, Politecnico provides know-how, Proof of Concept, intellectual property and tools for entrepreneurship dedicated to students and researchers.

04. COMMUNICATION AND BRAND ADVERTISING
Companies are paying increasing attention to the visibility of their brand as well as corporate communication: these actions can be amplified through various tools, with the involvement of teachers, students and the Alumni community.

05. WORKSPACES AND RESEARCH INFRASTRUCTURES
The University spaces and laboratories, provided with the best equipment for different applications, can be shared with companies for project design, prototyping, testing and development, combining the best mutual skills.
Research and Development

- **R&D projects**, in partnership or commissioned
- **Consulting, Analysis, Testing and Calibration**, even through certified laboratories
- **Participation** in regional, national, european and international R&D projects
- **Ph.Ds**, financed by current projects or by innovative subjects proposed by companies
- **Industrial Ph.Ds** financed by the Italian Recovery and Resilience Fund (PNRR)
- **Funding opportunities** financed by PNRR projects
  - Industrial research and experimental development
  - Voucher for innovation support
