ART. 1 (Programme overview)

The 14th edition of the 2nd level Specializing Masters Programme in “Space Exploration and Development Systems” (SEEDS) is offered by Politecnico di Torino for the academic year 2021/2022.

The administrative seat of this Specializing Master Programme is located at Politecnico di Torino – Office of Specializing Masters Programmes and Lifelong Learning (“Ufficio Master e Formazione Permanente”).

The programme is managed by the “Specializing Masters Programmes and Lifelong Learning School” (“Scuola di Master e Formazione Permanente”).

The Programme Director is Nicole Viola, professor at the Department of Mechanical and Aerospace Engineering of Politecnico di Torino.

ART. 2 (Training objective, didactic contents and organization of the activities)

SEEDS is focused on the human and robotic exploration of space and on the related missions, systems, and technologies. The purpose of the programme is to provide young graduates with the core applied physics and engineering skills required to develop space systems and missions from initial concept through design, assembly and verification, to launch and operations.

The 2nd level Specializing Master is a full time programme of one academic year duration for a total of 80 ECTS.

An internship period will follow. During the internship period, participants will elaborate a project work.

The Project Work is without any doubts one of SEEDS main qualifying features.

It lasts more than six months and is divided into three phases (see table n. 1), each one performed in a different SEEDS site. During the first and second internship phases, students will be host for sessions of concurrent design at the National Space Agencies, i.e the Italian Space Agency during the first internship phase and the French Space Agency during the second internship phase. The final event of the SEEDS Master will be held at ASI or ESA/Estec, where the final presentation of the main outcomes of the Project Work will be given by the team of students.

The Project Work deals with the design of a wide human space exploration mission. A different mission is identified every year in cooperation with the three SEEDS sites and in agreement with the National Space Agencies and main supporting industries.

Lectures will be held in English; training activities, except for the site visit and the internship, will take place at Campus Politecnico - Lingotto. The programme is residential.

The teaching programme includes 5 months of classroom activities with academic and corporate teaching staff and it is structured as follows (see table n. 2):
